- Includes Standard Sewn Hem and Metal Grommets
- Vibrant Color / Scratch Resistant
- Machine Washable
- Custom Finishing Available including pole pockets, hot knife edges and cutouts. (additional charges may apply)
- Recommended for Indoor Use

Dye sublimation printing is a heat-transfer process, whereby a graphic is first printed (in reverse) on a special transfer paper and then married with a polyester fabric. Using heat and pressure on the paper/ink/fabric, the ink turns into a gas and “sublimates” itself into the fabric making the final print permanent.

Compared to direct solvent print to fabric, the dye-sublimation fabric printing process can often provide more vibrant color results. This 100% polyester sublimation banner fabric is wrinkle resistant, scratch resistant and fully washable. Great for all varieties of marketing messaging. Recommended for indoor use.

- Interior P.O.P. Displays
- Trade Show Displays
- Backdrops
- Special Event Marketing

Standard Sewn Hem

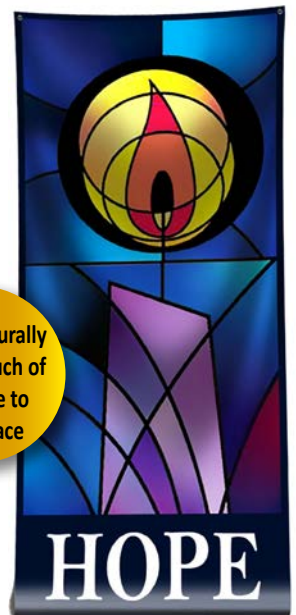

Sewn Hem & Grommets

Pole Pocket

These dye-sublimated fabric banners add a touch of elegance wherever they are used. It's a simple way to enhance the visual appearance and take your message to another level.

**Finishing:** Grommets in corners and every 24” (approx) is standard. Pole pocket available (specify at time of order).

### **Cleaning Fabric Banners**

Dye-Sublimated Fabric Banners can be machine washed with cold water and gentle cycle. Lay flat or hang to dry. Wrinkles or creases can be eliminated with hand steamer or warm iron. Do NOT bleach, or tumble dry

#### **DO:**

- Gently wipe banner with a clean and damp, soft cloth.
- Use warm water.
- If soap is needed use a mild, non-detergent cleaner.
- Rinse to remove any soap residue.
- Be sure banner is dry before storing.

#### **DO NOT:**

- Use any abrasive cloth, cleaning pads or brushes.
- Use any solvents or harsh chemical cleaners.
- Rub aggressively.

Harsh chemicals, abrasive cleaners or aggressive pressure can damage the fabric and/or the color print.
