

EPVC signs are made of expanded polyvinyl-chloride designed specifically for signs. Solid, lightweight, rigid, and versatile. PVC plastic signs are a durable option for all types of indoor and outdoor business signage needs.

- 3mm white EPVC
- Rigid yet slightly flexible
- Printed full color, one-sided or two-sided
- Laminated for scratch and UV protection (Optional dry erase lamination available)
- Small quantities available

One of the most popular plastic sign materials is polyvinyl chloride and when it is processed into flat sheets it becomes a product commonly known as PVC or EPVC. EPVC signs are a durable, versatile, and lightweight option that gives you a professionally printed sign you can use long-term for both indoor and outdoor settings.

- Menu Boards
- Elegant Signs
- Project Grids
- Corporate Charts
- Big Check Donations
- Thermometer Progress Scales

Superior to foam board signs. PVC signs are so versatile you can use them for a wide variety of applications. In addition to building signage indoors and outdoors, PVC is the perfect material for reusable signs or surfaces.

Add a dry-erase option and the sign surface becomes a white board surface. You can use standard dry erase markers to write on the sign, and a standard eraser or damp cloth to clean the surface for reuse.
