

Rectangle Flag Setup

1. This will show you how to setup your Rectangle Flag. Both use the same hardware.

2. The package will contain four hardware poles that need assembly. There will be 3 large poles, 1 small.

3. Take 2 long poles and use the push button to connect them. They will slide into each other.

4. Take the next size up hardware pole with the clamp attachment, and attach it to the other two poles.

5. Unscrew and remove the clamp, so we can slide the print on the pole, put it to the side.

6. Slide the pole into the longer top pocket of the flag

7. Then slide it all the way through to the bottom of the printed flag.

8. Now slide the short pole through the short top pocket of the printed flag.

9. Now Connect the long and short hardware poles together to complete the assembly

10. Slide the clamp back onto the bottom of the pole and tighten it.

11. The bottom of the flag print will have a loop. and the bottom pole will have a bungee cord. Thread the bungee cord through the loop.

12. Now tie and knot the bungee tightly to secure the printed flag to the hardware pole. Your flag is now ready.
