How To Make a Wrapping Paper Bag
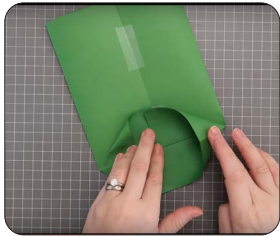

Step 1: Gather and Tape

Place the wrapping paper face side down on a flat surface and bring both the right and the left side towards the center, slightly overlap and press down to get a neat fold. Place tape along the entire length of the seam to secure it in place.
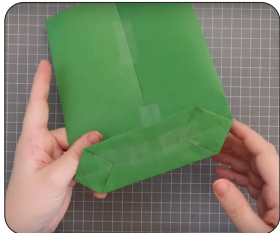

Step 2: Fold the Bottom of the Bag

Next, create what will be the bottom of the gift bag. Do this by taking the bottom of the folded wrapping paper up.

Step 3: Create a Mouth

Take the bottom section of the wrapping paper that you just folded up and open it so it sort of looks like an open mouth, then go ahead and fold it down by flattening out the corners.

Step 4: Secure the Bottom

Grab the ends of the top and bottom triangles and fold them towards the center, ensuring that there's an overlap. Press down, fold and secure all the seams with tape.

Step 5: Open the bag

Your gift bag is ready to be used now! Open it and stand it up, and check if any of the inside folds need an extra piece of tape for added sturdiness. Then, place your gift inside.
